Perceptual score was calculated based on the number of nominations and the actual ranks received.

For factual data collection, a dedicated website was created and the link was sent to universities. Sixty-two universities responded within the stipulated time.

Factual score was calculated based on information collected from universities and other secondary sources on the following parameters:

- ❖ Age and accreditation
- ❖ Infrastructure and other facilities
- ❖ Faculty, research and academics
- ❖ Student intake and exposure
- ❖ Placements (only for technical universities)

Final score = Perceptual score (out of 400) + factual score (out of 600)

Some top universities could not respond to the survey with factual information. For these universities, composite score was derived by combining the perceptual score for the university
