

JAWAHARLAL NEHRU UNIVERSITY
NEW DELHI-110067

Message to Students, Staff and Faculty Members

March 19, 2019

The university is highly appreciative of cooperation extended by all Schools, Special centres and Centres for their cooperation in the preparations for the smooth conduct of 2019-20 JNU Entrance Examinations. This is the first time ever that JNU is conducting the entire entrance examination through a computer based multiple choice pattern of tests.

Even the student community is happy with the computer based method of conducting JNU entrance examinations that will be non-discriminatory, less time consuming and that can provide the opportunity at a reasonable cost to hundreds of thousands of students from across India to sit for the test. The number of seats for M. Phil and PhD programmes is more than a thousand for 2019-20 academic year.

The National Testing Agency, a premier, autonomous and specialist agency, has been entrusted the task of conducting the entrance examinations for JNU in about 127 cities in different parts of the country making it more accessible than in previous years.

We are happy to inform you that the registration for the entrance examination is progressing rapidly with thousands of students already registered within a few days of the portal being made public.

(Dr. Pramod Kumar)
Registrar
