Engineering Department

CIRCULAR

13.03.2018

It is to inform you that water being received form Delhi Jal Board is very erratic and JNU is not getting sufficient water since last one month. Therefore, Engineering Department is not in position to supply sufficient water in the campus as per the requirement of residents. Due to which pumping is not possible in day time for 112 multistoried flats in Paschimabad area.

In view of this circumstance the pumping hours have been restricted to morning and evening only. Therefore, all residents are requested to use the water economically and keep some water stored in the house.

Your cooperation in this regard will be highly appreciated.
